AI DevSummit SF 2026

May 27-28, 2026
South San Francisco, CA

About AI DevSummit San Francisco 2026

AI DevSummit is the world's leading AI management & engineering conference, with tracks covering AI Management & Leadership as well as Chatbots, Machine Learning, Open Source AI Libraries, AI for the Enterprise, and Deep AI / Neural Networks. This conference targets AI managers & executives as well as software engineers and data scientists who are looking for an introduction to AI as well as AI dev professionals looking for a landscape view on the newest AI technologies.

Artificial intelligence technologies are the most potentially disruptive technologies facing the world, and the real breakthroughs in AI are AI developer technologies. Behind self-driving cars, facial recognition, health-care AI analytics, and customer targeting, there is a new AI developer technology.

AI DevSummit is the hub for the newest breakthroughs in AI developer technologies.

API World

September 1-3, 2026
Santa Clara, CA

About API World 2026

API World is the largest conference and expo at the convergence of the API Industry, AI Services, and Technology Services. The API World 2026 Conference and Expo was created with the mission to be neutral and facilitate connections, knowledge, trust and business within the developer community of API providers and consumers. If you are a software developer, a startup or an enterprise that consumes or provides multiple APIs this is your event.

The API industry has seen an incredible amount of technology innovation in the past decade, so this year at API World we are adding new conference tracks on API Design & Development, API Strategy, API & AI, API Ops, and more! Hear from Fortune 500 tech executives and Silicon Valley entrepreneurs how they planned, launched, and managed their API projects, both internal and external-facing. What are the most common pitfalls and errors that an API project team will make? How do microservices, swagger, GraphQL, API management tools, API analytics and security tools fit into the API project lifecycle?

CloudX 2026

September 1-3, 2026
Santa Clara, CA

About CloudX 2026

CloudX is the premier conference for cloud-native engineers and infrastructure teams building scalable systems. Join thousands of attendees for a fully immersive education and innovation experience, where you can learn & gain insights from top industry leaders about the newest cloud computing innovations, technologies, and tools.

With a fully immersive experience, we're bringing you: 8 conference tracks, 120+ speakers, technical keynotes, a live Expo with 50+ technologies & tools, product demos, and more.

CloudX is produced and owned by DevNetwork, the organization of the world's developer community — and producers of leading conferences for the engineering, IT & technology industries.

AI TechWorld 2026

September 1-3, 2026
Santa Clara, CA

About AI TechWorld 2026

AI TechWorld is a comprehensive conference & expo focused on AI-Augmented technologies, tools, and platforms powering the modern AI ecosystem.

The event brings together AI engineers, software developers, data scientists, and technology leaders to explore real-world AI applications, infrastructure, and best practices. Topics include AI platforms and tooling, enterprise AI adoption, AI infrastructure, model deployment and optimization, AI-powered applications, and the future of intelligent systems across industries.
